TEL-MED

TAPE LIBRARY

SPONSORS

Sebastian County Medical Society,
Ft. Smith Dental Association,
Sparks Regional Medical Center.

WHAT IS TEL-MED?

Tel-Med is a collection of tape-recorded health messages which have been carefully selected to:

- help you remain healthy
- help you recognize early signs of illness
- help you adjust to a serious illness

These tapes are 3 to 5 minutes long and have been written in a straightforward, easy to understand way. Every tape has been carefully studied by a panel of physicians to insure its accuracy.

IF YOU NEED A DOCTOR. . .

Tel-Med is not designed to tell you why you are sick. Only your doctor can do that.

HOW DOES TEL-MED WORK?

It's easy! Just give the operator the number of the tape you wish to hear. (See inside panels for a complete list of tapes.) Let's say you wish to know more about breast cancer. Simply dial the operator and ask for Tape #6: The operator will then play the tape for you which discusses this illness and the steps you can take to recognize it. If you wish to hear the same tape again, or any other tape, call back and the operator will be happy to play it for you.

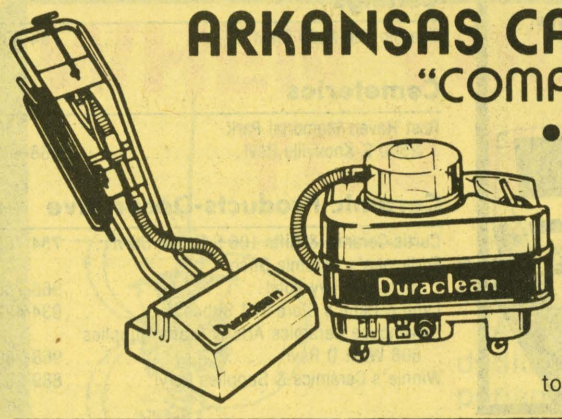
ARKANSAS CARPET & JANITORIAL SERVICE

"COMPLETE JANITORIAL SERVICE"

•DRAPERY CLEANING•



When furnishings are scrubbed 'steamed" or shampooed or when "do-it-yourself" sudsed powdered or sprayed much or all of the clinging, greasy grime goes deeper, to breed germs and to seep back to resoil the surface.

Let us also tell you... about our new, Exclusive Extractovator Process

- Latest technology for cleaning large carpet areas without damage caused by over-wetting
- Safe, mechanical foam extraction of deeply-embedded soil

When **Duracleaned,** soil comes *OUT*

Laboratory tests showed scrubbing took out only 46% as much soil as Duraclean. Do-it-yourself ways removed less or NONE.

Leading carpet and furniture makers recommend Duraclean Craftsmen to take the soil OUT and to prolong the life of the fabrics and carpetings they make.

Emergency and First Aid Procedures

Animal Bites
Thoroughly wash wounds with soap and water. Apply sterile gauze compress, and call your doctor. If possible, obtain location of animal, so that it can be tested for rabies.

Broken Bones
Call a doctor. Avoid handling victim until doctor arrives. If person must be moved, apply splint to immobilize the broken bone, tying on both sides of the break. In compound fracture (bone puncturing the skin), stop bleeding with pressure dressing. Avoid tourniquet.

Burns & Scalds
Apply ice *only*, preferably immersing burned area in ice water until the burning pain disappears. Do not puncture burned blisters. Small burns may be treated with antibiotic ointment and sterile dressings. For large burns, call your doctor.

Choking
For an adult: Give four sharp blows between the shoulder blades. If this does not work, stand behind the victim and grasp your hands around the victim's rib cage, and press into the victim's abdomen with a quick upward thrust. Repeat. *For a child:* Turn upside down and strike in the back.

Cuts
Wash the cut in running water. Apply pressure with sterile gauze until bleeding stops; then apply a mild skin disinfectant. Allow to dry and bandage with sterile gauze.

Fainting
Keep victim lying down, head lower than heart. Loosen tight clothing. If faint lasts longer than a few minutes, or if pulse is not regular, call your doctor.

Fever
Give appropriate dose of aspirin according to victim's age. *For an an adult:* Call the doctor or emergency room if temperature reaches 103° *For a child:* Call doctor or emergency room if temperature reaches 104°

Heart Attack
Call paramedics or ambulance at once. Don't move victim except to place them in a sitting position for easier breathing. Loosen tight garments and keep the victim warm. If victim is unconscious, start CPR.

Heat Exhaustion
Victim's skin is cool and clammy, face is pale, pulse weak, and temperature is subnormal. Move victim to cool place, loosen clothing and keep in lying position with head low. Wrap in blanket. Give salt solution to drink (one-half teaspoon of salt to one-half glass of water) at frequent intervals. Call doctor.

Insect Stings & Bites
Apply ice. Remove stinger if present. If more than local swelling and pain occurs, victim may be allergic and immediate medical attention should be sought.

Sprains
Avoid movement of injured area. Ankles, knees or other joints may be wrapped with thick cloth and immersed in ice water for half an hour, with treatment repeated at one-hour intervals. See your doctor for an X-ray, there may be a fracture.

Sunburn & Sunstroke
Victim's skin is hot and dry, face red, headache and fever. Keep victim in lying position with head elevated. Remove or loosen clothing. Bathe with cold water or immerse body in tub of cold water. Call doctor immediately.
